

Timber Trespass

Timber trespass can be a devastating event and can take a long period of time to resolve. We will provide a detailed evaluation of the area that was encroached upon and the trees that were removed.

A stump cruise will be performed to determine the number of trees, volumes, and values of removed trees. A detailed explanation of the findings will be drafted and submitted to the land owner to use in litigation proceedings.

Expert witness testimony to the findings can be provided in the event that the case goes to a court hearing.
