See if you can find examples of all of these animal movement styles while watching wildlife in your backyard! Draw what you observed in the frames below. And don’t forget to check the back of this sheet for more!

- **Walking:** slow movement; lifting each foot in turn, always having one foot on the ground
- **Running:** faster movement, always having some or all feet off the ground
- **Slithering:** sliding with belly on the ground
- **Jumping:** quick bounding movements of the hind legs
- **Swimming:** moving through water
- **Flying:** flapping wings to rise into the air
- Soaring: maintaining flight without flapping
- Floating: maintaining buoyancy to sit on top of the water
- Burrowing: traveling through the earth by digging
- Crawling: movement while dragging the body close to the ground
- Climbing: vertical movement up or down a surface. HEAD UP
- Climbing: same, but with HEAD DOWN
